

How to insert equation in PowerPoint with MathType

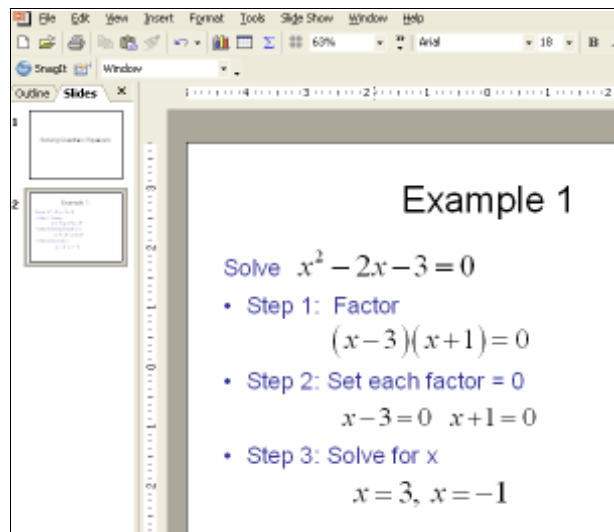

1. When you open PowerPoint, you should see the MathType icon on the toolbar

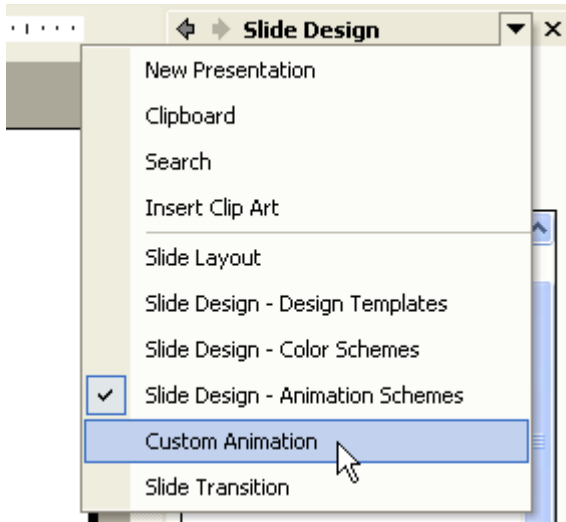

2. Click the icon, type the equation. After you save it, you will need to resize and reposition it.

3. Type the text and add equation objects where appropriate:

PowerPoint has features that allows for text and objects to appear. You will find these under Custom Animation:

You should experiment with some of the effects
