

The steps for a systematic approach to research

<p>Step One Identify and find background information on your topic</p> <p><i>Use encyclopedias, dictionaries, or text books</i></p>
<p>Step Two Use the library catalog</p> <p><i>Find books</i></p>
<p>Step 3 Use indexes and databases</p> <p><i>Find articles in scholarly journals, news or general interest periodicals, and popular periodicals</i></p>
<p>Step 4 Use a search engine</p> <p><i>Find internet resources</i></p>
<p>Step 5 Evaluate your sources</p> <p><i>Check the reliability and appropriateness of your sources.</i></p>
<p>Step 6 Cite your sources</p> <p><i>Give proper credit for information used</i></p>

Using the space to the right, your job is to **map** the steps for a systematic approach to research.
(Include both steps and explanation)
