

WRR Grading criteria:

Start with a 7 (this is the modal grade)

A. They said something, tried to make a point, loosely connected it to the class, it followed the length requirements and other rules BUT I can't answer the question "what point were they trying to make?" when I finish reading it—Stays 7

B. Same as a A, and they included a reasonable source and discussed it in a way relevant to the argument they tried to make—8

C. Same as a A, but I know what the point was when I get to the end—8

D. Same as B, but I know what the point was when I get to the end—9

E. Same as C, and the argument is well reasoned and brings in material from the class in a clear and obvious way—9

F. All of the above and a bit more (a really well thought out experiment design or something really surprising as an integration, even if it's totally out there)—10

G. None of the above—6 (it's hard to go below that)
